The ANX7808 is an ultra-low power SlimPort® transmitter designed for portable devices, such as smartphones, tablets, Ultrabooks, docking stations, sports cameras, camcorders, set top boxes, cradles, and adapters. ANX7808 works in conjunction with MyDP/DisplayPort™ receivers, such as the ANX7730 and ANX7732. The ANX7808 transforms the HDMI output of the mobile device’s application processor to MyDP or DisplayPort. External adapters can then convert MyDP or DisplayPort to HDMI, DVI, or to VGA so that the device can connect to any high-definition TV, monitor, or projector. Also, a passive MyDP to DisplayPort cable can connect to any DisplayPort connector. The mobile device’s USB connector functions as USB when a MyDP receiver is not connected.

**Features**

- **Standard compliance**
  - DisplayPort 1.2, MyDP 1.0, HDMI 1.4b
- **USB data in/out**
  - USB host, device or OTG data passes through by default
  - Meets requirements of inter-chip USB specification
- **Digital video and audio output**
  - SlimPort output over mini- or micro-USB connector
  - DisplayPort, eDP, or MyDP output over any connector
  - Configurable 1-lane output supports: 5.4Gbps, 2.7Gbps, or 1.62Gbps data rates
  - Stereo (3D) video output support
  - Single wire (C-WIRE) sideband communication
  - Integrated CEC Support
  - HDCP 1.3 content protection (optional)
- **Integrated analog switch and accessory detect**
  - Seamless switching between USB and MyDP
  - SlimPort cable detect with FAIL-SAFE mechanism
- **HDMI receiver input**
  - HDMI 1.4b standard compliant
  - Supports max pixel clock rates up to 185Mpixels/sec
  - 30 bpp color depth support in SlimPort mode
  - Up to 8 channels audio support
- **System operation**
  - Slave I²C device control interface
  - Built-in video BIST patterns generator for system self-test
- **Power requirements**
  - 1.0V, 1.8V, and 3.3V power supplies
  - Standby Power: < 25uW, while monitoring cable detect
- **Package offered:** VFBGA 49-ball
- **RoHS compliant and Halogen free package**
